EXPORT CONTROLS AND SANCTIONS COMPLIANCE STATEMENT
EXHIBIT A TO THE PLATFORM MASTER SUBSCRIPTION AGREEMENT - BLUESHIFT PLATFORM PRODUCTS AND SERVICES

Version: 1.0

Effective Date: March 9, 2026

1. Overview and Applicability

This Export Controls and Sanctions Compliance Statement is part of Blueshift's public legal stack for Blueshift platform products and services and is incorporated into and forms part of the PLATFORM MASTER SUBSCRIPTION AGREEMENT ("MSA") only if and to the extent the applicable Order, applicable Addendum, other controlling governing document, or Blueshift-controlled acceptance flow identifies this document by its specific title, EXPORT CONTROLS AND SANCTIONS COMPLIANCE STATEMENT, and designates the specific URL or other specific electronic location at which this document was made available to Customer, in each case as required by Sections 1.3, 1.4, and 1.5 of the MSA. Accordingly, this Export Controls and Sanctions Compliance Statement applies only to the extent the applicable Blueshift products and services are expressly identified, purchased, or activated in an applicable Order and this document is expressly incorporated in the manner described above, unless the MSA expressly provides that this document applies automatically to a particular purchased offering and the applicable legal stack or acceptance flow still identifies this document by its specific title and designated specific URL or other specific electronic location. In that case, this Export Controls and Sanctions Compliance Statement becomes part of the Agreement and is binding on the parties solely with respect to the Blueshift products and services covered by such Order and solely to the extent expressly incorporated and given effect under the MSA, including Sections 1.3, 1.4, and 1.5 thereof. For clarity, this Export Controls and Sanctions Compliance Statement is intended to supplement the export controls and sanctions provisions of the MSA and to provide an accessible statement of compliance requirements applicable to the Services covered by the applicable Order. Except to the extent expressly set forth in the Agreement, Blueshift does not undertake to provide legal advice, export classification determinations for Customer's specific use, sanctions screening of Customer-controlled persons or counterparties, or licensing analysis on Customer's behalf. Any customer-specific compliance obligation, implementation dependency, approval requirement, data-screening responsibility, licensing responsibility, geo-access restriction, or other unusual allocation of compliance responsibility relating to export controls or sanctions, and any heightened or more restrictive compliance obligation, shall be effective only if expressly stated in the applicable Order or another document expressly incorporated by reference in accordance with the MSA, clearly identified as applicable to the purchased offering, and given effect only as permitted by Section 1.3 of the MSA and the applicable Order. Blueshift is committed to compliance with applicable U.S. export controls and economic sanctions laws and regulations with respect to all Blueshift products and services, including the IntelliThreat AI Platform, Managed SOC & XDR services, and related integrations (collectively, the "Services"). Applicable laws and regulations include:

- U.S. Export Administration Regulations (EAR)

- Regulations administered by the U.S. Department of the Treasury, Office of Foreign Assets Control (OFAC)
- Other applicable export control and sanctions laws to the extent applicable to the parties' activities under the Agreement

2. Customer Responsibilities

Except as otherwise expressly stated in the MSA, an applicable Order, or another applicable Addendum or incorporated document expressly identified as applicable to the purchased offering, and only to the extent permitted by Section 1.3 of the MSA and the applicable Order, Customer may not, and may not permit any Authorized User or third party acting on Customer's behalf to:

- Export, re-export, transfer, access, use, or otherwise make the Services available in or to any jurisdiction, person, or entity to the extent prohibited by applicable U.S. sanctions or export control laws, except as authorized by applicable law
- Use the Services in violation of applicable export control or sanctions laws, including in connection with prohibited end uses or prohibited end users under applicable law
- Provide access to the Services to any person or entity that Customer knows, or reasonably should know, is prohibited from receiving such access under applicable export control or sanctions laws
- Use, export, or re-export the Services in a manner that would cause the Services, or Blueshift's provision thereof, to become subject to the International Traffic in Arms Regulations (ITAR), 22 C.F.R. Parts 120–130, without Blueshift's prior written agreement; subject to the MSA, including Section 1.3, and any applicable Order or other incorporated document given effect thereunder, Customer is solely responsible for independently determining whether Customer's specific use of the Services involves any defense articles, defense services, or technical data subject to ITAR, and for obtaining any required licenses, approvals, authorizations, or technical assistance agreements applicable to Customer's activities, data, or environment

3. Technology Classification

The export control classification of the Services, including whether any component may be designated EAR99 under the U.S. Export Administration Regulations, depends on the specific functionality, technical characteristics, destination, end use, end user, and applicable law at the time of export, release, transfer, or access. Any classification information Blueshift may provide is informational only as of the time provided, may depend on assumptions or facts supplied by Customer or third parties, and does not constitute a continuing representation, warranty, or covenant that the Services are categorically EAR99 or otherwise uncontrolled in all circumstances. With respect to ITAR: to Blueshift's knowledge, Blueshift does not design the Services to constitute or contain defense articles or defense services as defined under 22 C.F.R. Parts 120–130. However, as a specific allocation of responsibility relating to Customer's own environment, data, and use case, and subject to the MSA, including Section 1.3, and any applicable Order or other expressly incorporated document given effect thereunder, Customer is solely responsible for independently evaluating the applicability of ITAR to Customer's specific use of the Services, including any Customer Data processed through the Services, and for obtaining any required State Department

licenses, approvals, or technical assistance agreements applicable to Customer's use. Blueshift makes no representation regarding ITAR classification for Customer's specific use.

4. Reporting

Questions regarding export controls or suspected violations may be reported to: **compliance@blueshiftcyber.com. Submission of a report does not by itself create any obligation on Blueshift to provide legal advice, complete an investigation within any particular timeframe, or take any action except as required by applicable law or the Agreement.**

5. Binding Effect, MSA Incorporation, and Compliance Allocations

This Export Controls and Sanctions Compliance Statement is part of Blueshift's public legal stack and is incorporated into and made a part of the PLATFORM MASTER SUBSCRIPTION AGREEMENT only if and to the extent the applicable legal stack, Order, applicable Addendum, other controlling governing document, or Blueshift-controlled acceptance flow identifies this document by its specific title, EXPORT CONTROLS AND SANCTIONS COMPLIANCE STATEMENT, and designates the specific URL or other specific electronic location at which this document was made available to Customer, in each case in accordance with Sections 1.3, 1.4, and 1.5 of the MSA. Solely when the applicable purchased offering triggers its applicability under the MSA and this document is so expressly identified and designated, this Export Controls and Sanctions Compliance Statement becomes part of the Agreement and is contractually binding on the parties solely with respect to the subject matter and Services to which it applies and solely to the extent incorporated and given effect under the MSA, and supplements, but does not limit, any export control or sanctions compliance obligations set forth elsewhere in the MSA. This Export Controls and Sanctions Compliance Statement does not, by itself, obligate Blueshift to provide any Blueshift products or services not expressly identified in an applicable Order or other applicable Addendum, to monitor Customer's compliance on an ongoing basis, or to obtain licenses, approvals, or authorizations required solely because of Customer-specific data, destinations, end users, end uses, integrations, or deployment choices. Any customer-specific, product-specific, geography-specific, integration-specific, or otherwise unusual allocation of export controls or sanctions compliance responsibility, and any heightened or more restrictive compliance obligation, shall be binding only if it is set forth in clear and conspicuous terms in this Export Controls and Sanctions Compliance Statement, the applicable Order, or another schedule, exhibit, addendum, service description, or other document expressly incorporated by reference in accordance with the MSA, the applicable Order or other applicable incorporating document identifies that document as applicable to the purchased offering, and such obligation is given effect only as permitted by Section 1.3 of the MSA and the applicable Order. For clarity, no general reference to online policies, implementation materials, support guidance, or other extrinsic materials will, by itself, create or expand Customer compliance obligations unless such materials are expressly incorporated in accordance with Sections 1.3 and 1.4 of the MSA. In the event of any conflict or inconsistency between this Export Controls and Sanctions Compliance Statement and the MSA, any applicable Order, or another applicable Addendum, Section 1.3 of the MSA shall govern exclusively, and this Export Controls and Sanctions Compliance Statement shall not amend, override, or control over any such document except to the extent, and in the manner, expressly permitted by Section 1.3 of the MSA and the applicable Order. Any amendment or modi-

fication to this Export Controls and Sanctions Compliance Statement must be made in accordance with the amendment provisions of the MSA, and no unilateral website posting, compliance communication, or operational guidance will amend the Agreement except as expressly permitted thereunder.
